## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 and 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. The phrase "usable particularly" in claim 1, from which the balance of the claims depend, renders the claims indefinite because it is unclear whether the limitations accompanying the phrase are part of the claimed invention. See MPEP § 2173.05(d).

4. Ex parte Markush sanctions claiming a genus expressed as a group consisting of certain specified materials. See Ex parte Head, 214 USPQ 551 (Bd. App. 1981); In re Gaubert, 524 F.2d 1222, 187 USPQ 664 (CCPA 1975); and In re Harnisch, 631 F.2d 716, 206 USPQ 300 (CCPA 1980). One acceptable form of a Markush group, recites members as being "selected from the group consisting of A, B and C." See Ex parte Markush, 1925 C.D. 126 (Comm'r Pat. 1925). However, it is improper to recite the members of the groups in the alternative, (i.e., "or") such as in claims 4 and 6. Ex parte Dotter, 12 USPQ 382 (Bd. App. 1931). See MPEP 2173.05(h)

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-6 and 11-13 are rejected under 35 U.S.C. 102(a) as being anticipated by Sudo et al. (JP 2002235013).

In the abstract, Sudo et al. teach a material composition comprising a thermoplastic resin, such as polystyrene, and a biodegradation component, such as polycaprolactone, along with a powdered rice chaff.

Thus, the requirements for rejection under 35 U.S.C. 102(a) are met.

7. Claims 1-6 and 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Meier et al. (CA 2,161,059).

In the abstract, page 4, last ¶, and page 5, Meier et al. teach biodegradable materials, such as starch, being modified by adding a blend comprising a biodegradable polyester, such as polycaprolactone, and a polymeric auxiliary such as polystyrene,

Thus, the requirements for rejection under 35 U.S.C. 102(b) are met.
